DatE-IT fair opening hours

Thursday Nov. 12, 10:00 - 16:00

Speakers week (12:00 - 13:00)

Ghost Games: Tuesday Nov. 10

Bekk Consulting: Wednesday Nov. 11

Résumé photography

Uno Lamm, Thursday Nov. 12, 12:30 - 16:00

Why DatE-IT?

Welcome to the DatE-IT fair 2015!

My name is Emil Rosenberg and I'm the project manager for this years fair. I want to personally welcome you to the DatE-IT fair! We offer students from Computer Science (D), Electrical Engineering (E) and Software Engineering (IT) a great opportunity to make connections with different companies. The fair is being held in the EDIT-building, making it easily accessible for students for said fields!

This year we have 48 companies. I encourage all students to visit the fair to meet your next employer. It doesn't matter what year you're in, this fair is for all of you. Perhaps during the fair you will receive information about summer internship, master thesis's or even full-time jobs.

The days before DatE-IT we will have two speakers week lectures. By visiting this kind of lecture you will get a great insight of what the companies are doing, as well as being prepared to talk to them during the fair. Also, we have eight companies offering interviews during the day. If you have applied with your resumé this is a great chance to meet the recruiters and maybe, get an offer.

New for this year we also offer you to take a professional photo of yourself, for free! This will boost your resumé for future job searches. So be sure to visit CFFC at Uno Lamm from 12:30!

Have a great day during the DatE-IT fair!

A handwritten signature in blue ink that reads "Emil Rosenberg".

Emil Rosenberg
Project Manager, DatE-IT 15

MAKE A DIFFERENCE

Vi skapar effektiv e-handel
- allt från webb till logistik.

Tekniken står aldrig still,
det gör inte vi heller.

"För ett par år sedan mötte jag 3bits på DatE-IT och vi pratade om möjligheten att göra exjobb hos dem.

Efter ett spännande exjobb är jag nu anställd som utvecklare på 3bits och får möjlighet att utveckla och utvecklas så som jag önskat."

Alexander Lundgren, Utvecklare 3bits

jobb@3bits.se

Vill du utveckla moderna e-handelslösningar tillsammans med oss på 3bits?

3bits grundades 2008, vi är 30 personer som brinner för e-handel och utvecklar tillsammans med våra kunder avancerade webb- och e-handelslösningar – allt från webb till logistik. Vi har fått förtroendet att leverera olika lösningar under många år till flera av våra framgångsrika kunder som Lindex, Tingstad, Focus Nordic och Scandinavian Photo. Vi är mycket väl insatta i hela processen och bygger e-handel som om den var egen.

Vi genomför våra projekt in house eftersom vi tror att närhet till kollegor och gemenskap är viktigt både för arbetsmiljön och för ett effektivt samarbete. Det centrala kontoret i Göteborg har plats för fler när vi växer. Hos oss får du möjlighet att arbeta med aktuell teknik och spännande projekt tillsammans med dina kollegor i utvecklingsteamet.

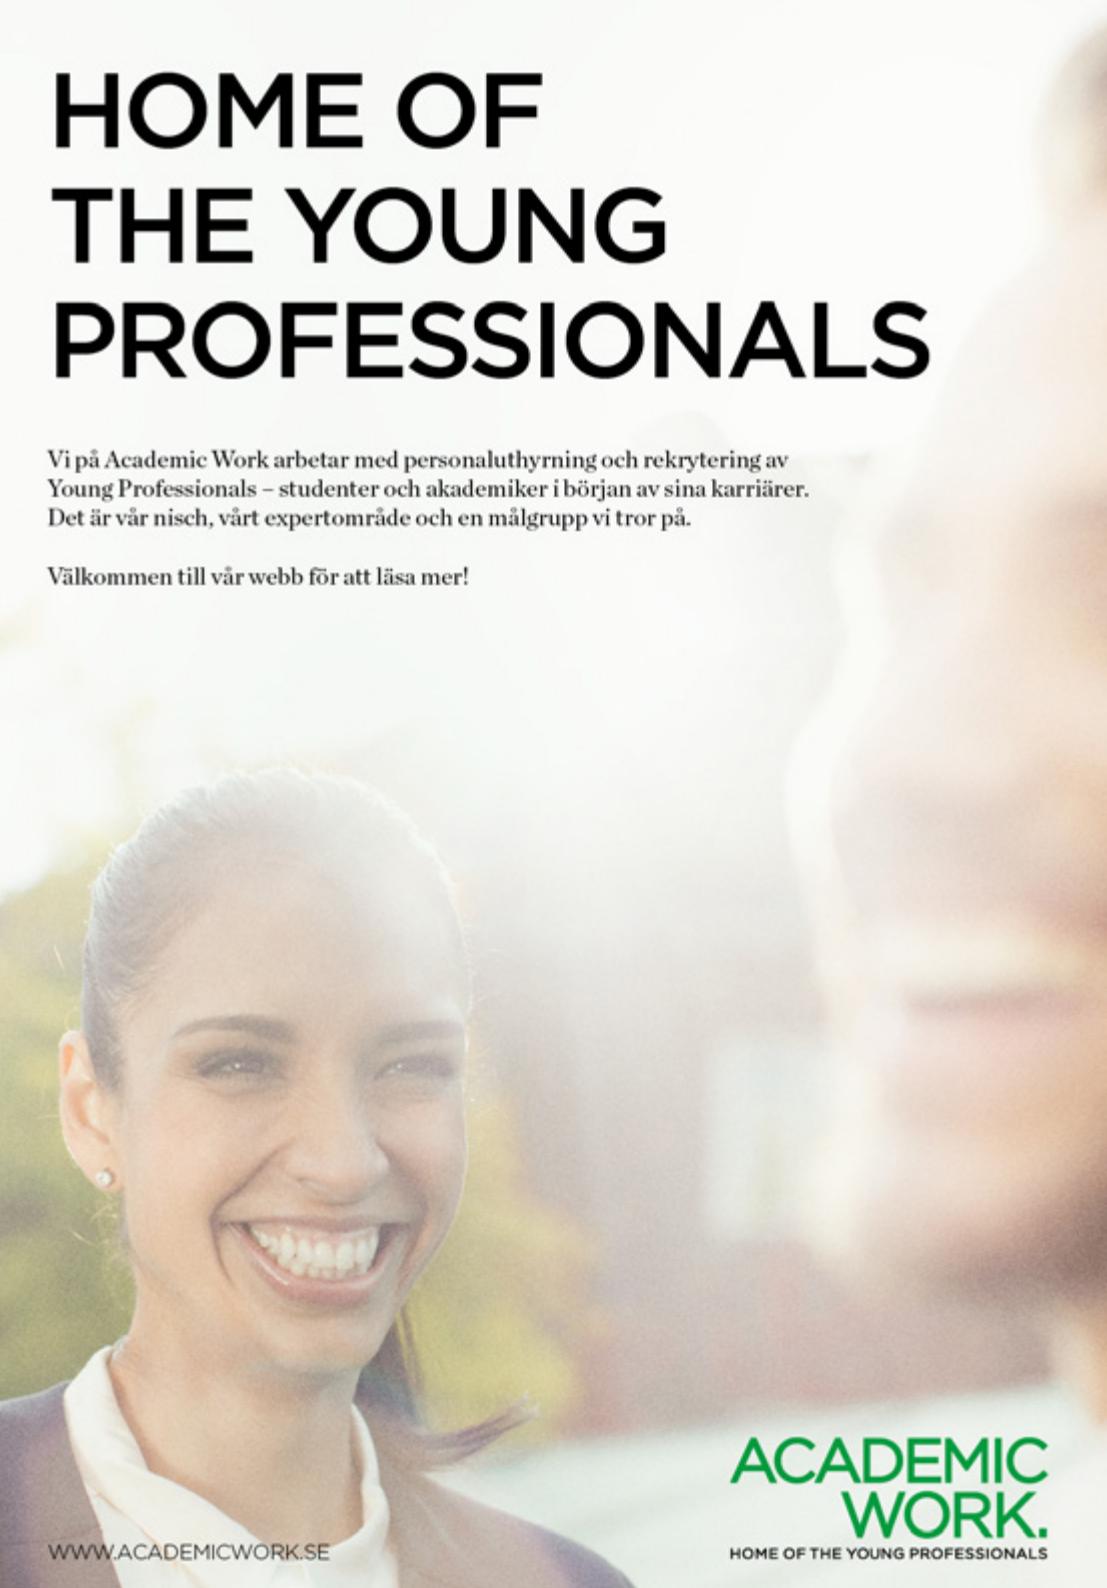

Vi har tagit emot utmärkelsen Superföretag 2014 av Veckans affärer och Bisnode som en av få e-handelsleverantörer i Sverige. 3bits fanns även för andra året i rad med som Gaselföretag 2014, som utses av Dagens industri.

Är du intresserad av att göra ditt exjobb hos oss eller av en anställning på 3bits? Kom förbi vår monter och prata mer, eller skicka ditt CV till jobb@3bits.se.

HOME OF THE YOUNG PROFESSIONALS

Vi på Academic Work arbetar med personaluthyrning och rekrytering av Young Professionals – studenter och akademiker i början av sina karriärer. Det är vår nisch, vårt expertområde och en målgrupp vi tror på.

Välkommen till vår webb för att läsa mer!

Academic Work is Home of the Young Professionals. We work with staffing and recruitment of students and graduates in the start of their careers. It is our niche, our area of expertise and a target group we believe in. We operate in six countries, have a turnover of 1.6 billion SEK and mediate over 14 000 jobs each year. We are interested in you who study or have graduated, with up to five years of work experience. Through us, you can get stimulating work opportunities within various industries, establish important contacts for the future and get a great start of your career.

In our booth you will get information about current positions and assignments fitted for your personal interest. We are here to answer your questions and can even help you to improve your resume and cover letter.

As global leader in innovation and high-tech engineering consulting, Altran accompanies its clients in the creation and development of their new products and services.

Altran has been providing services for around thirty years to key players in the Aerospace, Automotive, Energy, Railway, Finance, Healthcare and Telecoms sectors. Covering every stage of project development from strategic planning through to manufacturing, Altran's offers capitalise on the Group's technological know-how in five key areas: Intelligent Systems, Innovative Product Development, Lifecycle Experience, Mechanical Engineering, and Information Systems.

Innovation is our beacon and that is why we call ourselves "Innovation Makers". Internationally Altran has more than 24 000 employees in more than 20 countries. In 2014, the Altran group generated revenues of €1.756bn.

ARCCORE is an independent vendor of automotive software with a clear focus on the AUTOSAR standard. A stringent implementation of the standard with state of the art technology and flexibility for its customers makes ARCCORE's proposition unique.

Founded in 2009, ARCCORE is offering its AUTOSAR products, support, services, trainings and complete solutions to the global automotive market with locations in Gothenburg, Munich and Bangalore.

The experience gained in many projects and the own product development allows ARCCORE to develop dedicated solution for its customers meeting their specific demand.

ARCCORE's product portfolio consists of Arctic Core, a comprehensive AUTOSAR 4.x stack, and Arctic Studio, a complete IDE for AUTOSAR based software. ARCCORE also serve the global automotive industry with OEM specific distributions, solutions for ISO26262 requirements, tools for the workflow and bootloaders.

ARCCORE reinvests 30% of its revenue in the product development, in order to meet the high expectations of its customers. ARCCORE achieved a revenue growth (CAGR) of more than 50% for the last couple of years and expects to strongly enhance its position within the fast growing market for automotive software.

CANEA är ett relativt litet bolag som utvecklar och säljer en produkt som går under namnet CANEA ONE.

Hos oss är varje anställd viktig och har stor påverkan på hur vi jobbar och hur vår produkt utvecklas.

CANEA har sitt kontor mitt i Göteborg och startades av Chalmerister i mitten på 90-talet. Sedan dess har det vuxit till ca 60 anställda med kontor i Stockholm och partners världen över.

CANEA utvecklar och levererar IT-lösningar för Projekt- och portföljhantering, Ledningssystem, Dokument- och Ärendehantering, Processmodellering och Strategisk planering och uppföljning. Våra system kännetecknas av lättanvända gränssnitt, innovativ funktionalitet och flexibel konfiguration!

Vill du bli en i vårt vassa utvecklarteam?

Vi erbjuder dig:

- Spännande och utmanande exjobb
- Att arbeta med utveckling av världsledande produkter inom visualisering av kartor
- Att utveckla expertkompetens inom heta teknikområden
- Möjligheter att jobba nära våra kunder över hela världen

These days, geospatial technology is essential in many mission critical systems. Robustness and performance are important issues when selecting the right technology for command & control systems; and openness and scalability are just as important when dealing with large geospatial datasets in enterprise-wide installations.

Carmenta's mission is to provide world-class geospatial products and solutions as well as systems for emergency response and critical infrastructure protection. We help our customers to stay ahead when it comes to the management and visualisation of geographical information and situational awareness.

CPAC Systems is a fast-growing and profitable company within the Volvo Group. We are passionate about turning advanced technology into industrialized solutions for our end customers. Working with system integration in safety critical control systems, we have a proven track record of developing and industrializing differentiating technology within maneuvering, X-by-wire systems, HMI and hybrid development. Our clients are global renowned brands within the commercial transport industry, both within and outside the Volvo Group.

Our corporate culture has been one of our key success factors. It is characterized by strong entrepreneurship, responsibility, openness and lack of prestige. To thrive here, we believe that you need to like working in a creative and fast paced environment with all its pros and cons.

Cybercom is a leading edge Nordic ICT Company assisting leading companies and organisations to benefit from the opportunities of the connected world. The company's areas of expertise span the entire ecosystem of communications services. Cybercom's domestic market is the Nordic region, and in addition the company offers global delivery capacity for local and international business. Cybercom was founded in 1995 and has been quoted on the NASDAQ Stockholm exchange since 1999.

**WE DON'T WAIT FOR THE FUTURE
TO HAPPEN. WE CREATE IT.**

Delphi Infotainment & Driver Interface engineers in Sweden have been providing customers with **state-of-the-art infotainment systems** for many years. Now we are embarking on one of our most exciting engineering challenges yet!

Volvo Cars department for Driver Interaction & Infotainment is responsible for the entire infotainment system, developing and verifying systems and components within the infotainment area at Volvo Cars. Driven by our very high ambitions in SW development, we will build the most adaptive and competitive infotainment platform in the automotive industry!

Our joint target at **Delphi and Volvo Cars** is to develop the next generation infotainment and market leading user experience based on Linux to be used in future vehicles. Our cooperation is maximized by co-locating Volvo and Delphi engineers in central Gothenburg.

As a **Software or System engineer** in our joint team, you will be working in agile feature teams developing and integrating software components. You will be expected to work in the full vertical stack, from developing middleware components up to the HMI.

Together with some of the most talented engineers around the world, you and your team will create innovative human-centric car technology that makes life **less complicated and more enjoyable** for people.

Electronic Arts have two development studios in Sweden, DICE and Ghost Games. Many of our employees are industry veterans, but we also employ numerous interns and graduates every year.

DICE, the award-winning developer based in Stockholm, is best known for creating the phenomenally successful Battlefield franchise with the widely acclaimed Battlefield 4 being the latest installment. In a few days, DICE will release Star Wars Battlefront while the highly anticipated Mirror's Edge is currently in the making. We share the passion to create something extraordinary.

Founded in 2011, Ghost is the franchise owner of Need for Speed. Located in central Gothenburg with studios in Guildford and Bucharest. We are committed to delivering great games that connect gamers and we aim for the highest quality in everything we do. This molds our everyday workspace and our way of working.

Last week we released our latest game, Need for Speed.

IT'S A BIG SMALL WORLD

Away from home you're not alone. It's about making two people on two different continents feel like they are in the same room. And that begins with the people who connect almost half the population on this planet of ours.

We are a world leader in the rapidly changing environment of communications technology – providing equipment, software and services to enable transformation through mobility.

Some 40 percent of global mobile traffic runs through networks we have supplied. More than 1 billion subscribers around the world rely every day on networks that we manage. With more than 37,000 granted patents, we have one of the industry's strongest intellectual property rights portfolios.

Our leadership in technology and services has been a driving force behind the expansion and improvement of connectivity worldwide. We believe that through mobility, our society can be transformed for the better. New innovations and forms of expression are finding a greater audience, industries and hierarchies are being revolutionized, and we are seeing a fundamental change in the way we communicate, socialize and make decisions together.

These exciting changes represent the realization of our vision: a Networked Society, where every person and every industry is empowered to reach their full potential.

Talent attract talent. To find new talented people we must make the ones who are already working here thrive and feel inspired. How? Well, talented people must be respected as equals and be given the freedom to create and innovate. You don't hire a talent to tell him or her how to do what they are talented at. We want our people to feel encouraged to act independently and bravely, that is how their talents best are put to use for Findwise and our clients.

Tomorrow, simplicity will rule. Simplicity means easier, faster and smarter. We are experts in creating search driven solutions for various business needs. Among our clients are SKF, SCA, Chalmers, SEB, Scania, Swedish Social Insurance Agency and Telenor. Our goal is to help them maximize the business value of their information assets. To make knowledgeable decisions easier and faster.

Award winning Findwise, founded in 2005, is a growing IT consultancy with 100 employees at offices in Sweden, Denmark, Norway and Poland. We offer platform independent consulting to create Findability solutions. We supply search technology expertise as well as consulting in related fields such as user experience, linguistics, information management, big data and security.

Vi har hjälpt tusentals Unga Talanger ut i arbetslivet. Vi hjälper gärna dig också!

Framtiden helps young professionals to get at job. Everyday we strive to find and create meetings between the right company and the right young professional. Young professionals are people who are in the beginning of their careers and who are driven and innovative. Framtiden works with companies within all industries – technology, data/IT, marketing, sales, finance, administration and production/logistics. We are currently located in seven cities around Sweden.

Google is and always will be an engineering company. We hire people with a broad set of technical skills who are ready to tackle some of technology's greatest challenges and make an impact on millions, if not billions, of users. At Google, engineers not only revolutionize search, they routinely work on massive scalability and storage solutions, large-scale applications and entirely new platforms for developers around the world. Apply for a job: google.com/jobs

Google has an exciting and innovative internship program for students in a variety of different fields. We're looking for students pursuing degrees in computer science and related areas who love to problem-solve, code and design. If you like working on challenging and intriguing problems in an entrepreneurial environment that respects creative approaches and solutions, then a Google internship is for you. To learn more, see: google.com/jobs/students

HiQ HELPS TO MAKE THE WORLD A BETTER PLACE BY MAKING
PEOPLE'S LIVES SIMPLER AND BETTER.

In a world that is spinning faster and faster, HiQ has the know-how and the experience to help our clients all the way from idea to implementation. We see technology as part of a larger context, and as a tool for making a difference in people's everyday lives. Our creation of innovative services such as the Swish and Collectors Betalkoll apps for the banking industry, and our development of active safety systems for the automotive industry – systems that save lives – are just two examples of how we help our customers to do this.

HiQ Gothenburg was established in 1998 and today we are over 300 specialists with expertise in fields such as software development (from start to finished product), quality management (especially testing and verification), qualified project management and business development, mobility and web development. HiQ Gothenburg works with four business areas, R&D Solutions, R&D Automotive, Web & Mobile and Sciences & Society. We work with global brands that share our desire to make the world a little simpler. And a lot more fun.

HMS Industrial Networks is the leading supplier of industrial communication solutions. Our products enable industrial devices to communicate on different industrial networks and also be monitored/controlled remotely.

HMS is a Swedish company with headquarters in Halmstad and sales offices in 10 countries. Although we're spread out all over the world, we like to think that we bring a little bit of our Swedishness to all our offices. By this we mean a flat organization with a lot of freedom to realize your own ideas and affect the company as a whole.

Most of our staff are engineers working within R&D but there are also engineers working with Sales, Marketing, IT and Manufacturing. As a part of our team you'll get to work with and learn from some of the world's leading experts on industrial communication.

We believe that work should be challenging, rewarding and fun and since we work at the forefront of technology, it is crucial that we constantly develop our skills.

We are always on the lookout for talented people who want to develop together with us. If you want to work with cutting-edge technology in an international environment, make sure to come talk to us at Date-IT!

Idevio är ett växande produktbolag som fokuserar på programvara för geografisk information. Vår teknik för att komprimera och strömma vektorbaserad kartdata är världsledande och används i allt från arbetsstationer till mobiltelefoner. Vi är verksamma inom områdena Business Intelligence och Transport&Logistics och har kunder över hela världen inom områden som fordonsbranschen, myndigheter och detaljhandel. Inom Business Intelligence tillhandahåller vi attraktiva kartor med affärsgrafik kombinerat med geografiska analyser. Inom Transport&Logistics har vi förutom kartpresentation produkter för t.ex. geofencing, mapmatching och tracking.

Utvecklingsteamet jobbar främst i Java och Javascript. Eftersom vi är ett litet företag är arbetsuppgifterna varierande och alla utvecklare är delaktiga i hela utvecklingsprocessen. Om du är intresserad av det vi sysslar med så kom förbi vår monter och prata med oss. Vi letar alltid efter talanger som vill vara med i våra team av kompetenta medarbetare. Vi håller till i charmiga lokaler i centrala Göteborg.

Invativa är specialister på digitala affärer. Vi riktar oss till uppdragsgivare som har många kunder, tiotusentals eller fler.

Andra IT-tjänsteföretag är ofta större än vi. De har alltid bredare erbjudande. Vi tävlar med dem om ditt förtroende, men enbart inom vårt specialområde: Digitala Affärer.

Där har vi längre erfarenhet och djupare kompetens än de stora. Av oss får du stöd i alla dimensioner av din digitala affärsmodell, från analys och strategi till innovation och produktion.

Förvänta dig att vi utvecklar mer innovativa erbjudanden och får dem i produktion snabbare. Förvänta dig nya intäkter från tjänster du inte kan föreställa dig i dag.

Netlight is an IT consultancy that works with systems/web/app development, IT management and UX. We are continuously looking for new talents who want to work with the latest technologies in business-critical projects with market-leading international companies as well as in innovative start-ups.

Together we deliver independent solutions and valuable results by applying our core values: competence, creativity and business sense. We work in a flat network organization characterized by a high degree of commitment and responsibility, as well as smooth communication and collaboration throughout the company. We are a company with an open, encouraging and unpretentious atmosphere. We offer a great community and a rapid career development in an international environment.

Netlight has over the years received a number of awards like the marathon-Gasell in Dagens Industri, Årets Superföretag från Veckans Affärer, Innovator of the Year from Universum and last year our CEO Erik Ringertz was appointed CEO of the year. We are also the initiator to #TechEq which is a collaboration between several technology companies that are working to increase gender equality in the technology industry.

Palantir is a leading Silicon Valley technology company, our mission is to deploy the most powerful products we can build against the hardest problems we can find, wherever we are needed most. Palantir Technologies designs, develops, and deploys software products that have transformed how the world's most critical government, commercial, and non-profit institutions use their data and revolutionized work in an incredibly diverse set of problem spaces.

Our first deployments in Europe date back to 2008 and our Stockholm and Copenhagen offices opened in 2013 and 2015, respectively. Our objective is to produce extraordinary outcomes for our government and commercial customers throughout the Nordics. To achieve these outcomes, we forge close partnerships with our customers and embed our world-class engineers onsite to implement and extend our technologies. By rapidly deploying our productized software solutions, we can iterate quickly to solve mission-critical problems.

Purple Scout is a consultancy with a lot of programmers who specialize in Open Source. We want our customers to take advantage of all the benefits that Open Source has to offer. In other words we help our clients by developing effective software. Our customers know that our industry leading Open Source experts will create the perfect solution for their projects. Purple Scout make it work and we have since 2004.

Purple Scout is all about having fun at work. When Johan and Kasper started Purple Scout, above all they really wanted to have a job that felt great going to on Mondays (and all other work days of the week) – and that still applies. No more Sunday anxiety. Purple Scouters look forward to going to work. Yup, we even like hanging out together so much that we often meet up after working hours. We have Oktoberfest celebrations, champagne tastings, geeky hackathons, ordinary After Works (with beer and a lot of nerdy code talking), parachuting, tech talks, lessons in swordsmanship and so on. Do you have a good idea for an AW? Is it purple? Let's do it!

QRTECH is a successful product development company that develops, industrialises and manufactures products containing electronics, power electronics and software. The products we develop are often technically challenging and need to work effectively in demanding environments. Our clients operate in all areas that require advanced expertise in product development, from small companies to multinationals.

The cornerstone of our development work is wide-ranging applied research in collaboration with industry, academia and research institutes. This allows us to offer our customers world-class, future-assured products.

Our success is founded on solid commitment and the fact that we genuinely care about our customers. QRTECH has the most technically skilled engineers in the industry with the determination on every level to succeed and do a good job.

Operations comprise product development, product sales and engineering services.

Product development is a complete undertaking by our offices and our laboratories.

We offer engineering services for the whole product development chain. Contracts can be carried out either at the customer or at our office.

Qualisys is a leading provider of motion capture technology and has a long history of supplying research, engineering and sports facilities with the tools and know-how of capturing and analysing movements. Qualisys offers a wide range of products and services, including its advanced motion capture platform, which is the core business. The platform consists of optical motion capture cameras and the software needed to process and analyze the motion data. It's the same technology used for animation in block buster games and movies. At Qualisys, we do product design, VisualC++, C++ embedded, VHDL, image processing, full stack web development, Java, C# and much more. Qualisys' headquarter is located in central Gothenburg and currently has 25 employees. Sounds interesting? Come and have a chat with us.

We are a product development company offering services in embedded wireless system development. We work with global technology leaders and small innovative companies alike.

With years of experience in designing and developing automotive, telecom and medical products employing wireless communication technologies; we help our clients through each phase of product life cycle of a wireless embedded system. With Scionova onboard, you get access to a pool of talented engineers; who has years of industry experience and have a passion for wireless technology. Scionova has developed and deployed many embedded wireless systems on schedule meeting highest quality standards.

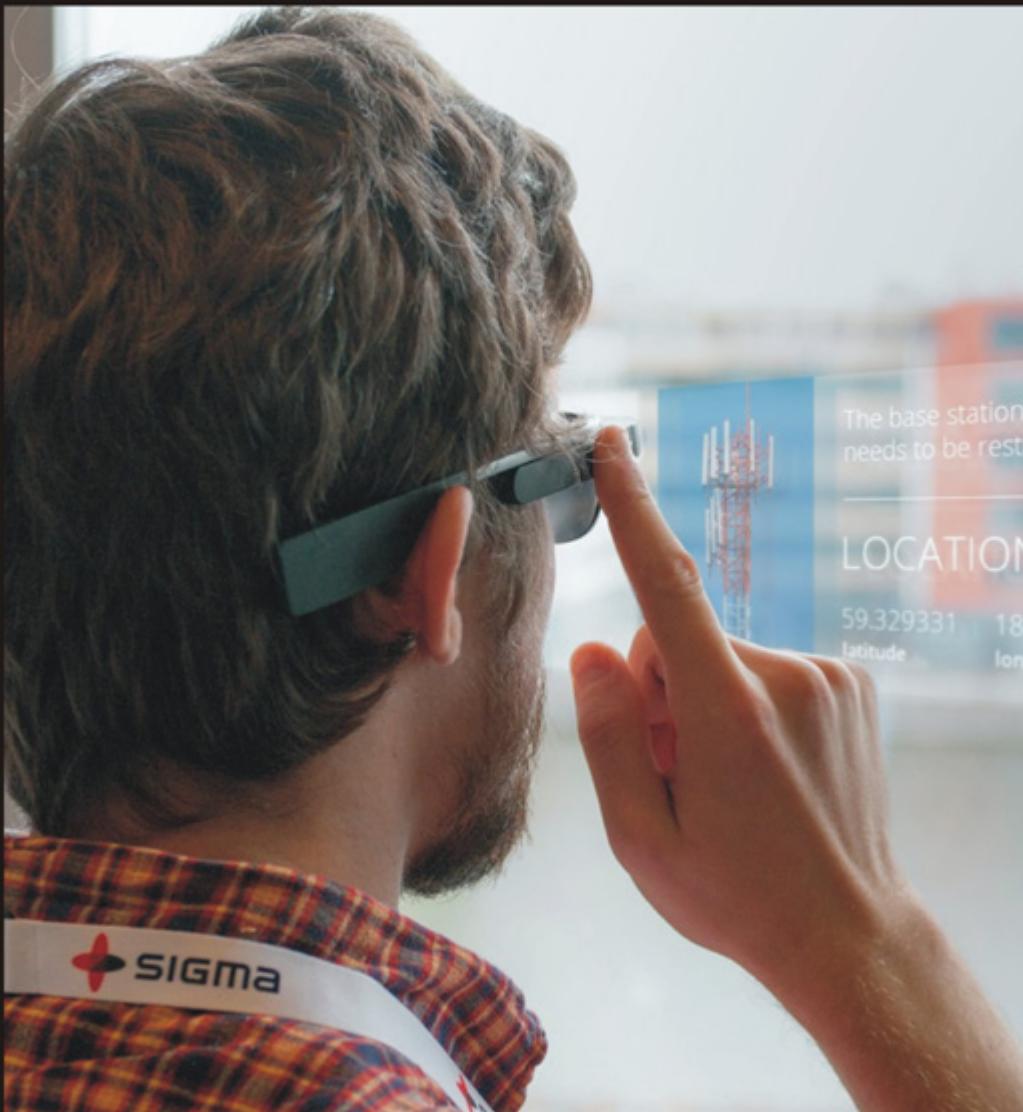

Scionova is specialized in product development, and offers services for each phase of wireless embedded product life cycle. The company is founded in 2005 and has its headquarter located in the southwestern parts of Sweden.

Scionova has a team of cherry-picked engineers who has a passion for wireless embedded systems backed with extensive experience in designing and developing embedded wireless systems.

Our client portfolio ranges from great world-leading technology companies to smaller start-up companies.

And so, our goal is to always provide assignments where you will work on cutting edge technologies and can sharpen/develop skills to reach career goals.

LET US VISUALIZE YOUR FUTURE!

We're looking for engineers with the talent and passion to change the world with us.

We are a team of hardware and software innovators dedicated to solving our customers toughest embedded design challenges. For nearly 20 years, we have created the silicon, software and tools that enable the world's leading engineers to create products that disrupt industries and change the world. If you are interested in becoming part of a fast moving and dynamic company like Silicon Labs, we'd like to hear from you.

We can offer interesting summer jobs for students who still have some years remaining of their studies. From day one you will be trusted with significant and exciting tasks, and work on real and important projects in a great work atmosphere.

Our design center is located in Nydalen, Oslo, with around 55 employees from more than 10 different countries. In total Silicon Labs has 1200 employees all over the world.

Job areas

- Digital design
- Analog design
- Software development
- Hardware tools
- Test and characterization
- Marketing

A summer job in Silicon Labs will give you the opportunity to learn a lot, work on real projects and have interesting tasks while having fun!

At SpeedLedger we value simplicity, responsibility, courage and we love a hint of madness. We focus on our customers and believe in doing one thing really well rather than maximizing feature count. Our curiosity is what drives us forward and keeps us focused on our goal - to make administration automated and more enjoyable for small businesses. Come by our booth if you are interested in our tech stack or if you want to put your engineering skills on test! Do you have what it takes?

Squeed AB är ett kompetens och innovationsbolag verksamt inom mjukvaruutveckling.

Vi har skapat en innovationskraft där varje Squeeder hjälper till med att ta fram nya affärsidéer i form av produkter och tjänster.

Denna innovationskraft leder och utvecklar företaget. Att stimulera och tillvarata kreativitet är därför vår grundläggande affärsidé.

Squeeders jobbar med systemutveckling, arkitekturfrågor, coaching, mentorskap, utbildningar, metoder mm. Vi är experter på Java, Microsoft .Net och open source. Vi är mycket ute som konsulter och bygger det våra kunder vill ha men arbetar också med att ta fram nya tjänster och produkter.

Squeed är djupt engagerade i communityn kring mjukvaruutveckling så som Javaforum, nforum mm.

Squeeders syns och hörs ofta på konferenser och mjukvaruträffar som Javaforum, JavaOne, Microsoft TechDays, MSDN Live, SweNug, Developer Summit, JFocus, JavaZone...

Vi har stora ambitioner och behöver duktigt folk som vill vara med att uppnå "Achieve the Amazing" i både Göteborg och Stockholm.

Syntronic is a leading design house specializing in advanced product and systems development, production and aftermarket services. Our offer covers the entire life cycle of a product or system from the concept stage to a finished product including life cycle support during its entire lifetime.

Among our customers and partners are some of the world's most technology intensive businesses and organizations in sectors such as the telecom, defence, industrial, medtech and automotive.

In the designing process to satisfy customers' needs, we focus on quality, competence and ease of production.

Are you passionate about technology?

Do you want to shape the future and improve people's lives? Are you passionate about technology and want to make a difference?

ÅF we develop innovative and sustainable solutions. ÅF is ranked as one of Sweden's most popular employers amongst engineers.

ÅF is at the heart of technology.
