Speakers week (12:00 - 13:00)

Thursday	6/11 - HB2: Appear TV
Monday	10/11 - HB2: Enfo
Tuesday	11/11 - HB2: SAAB
Wednesday	12/11 - HB2: BEKK

DatE-IT fair opening hours:

10:00 - 16:00

Why DatE-IT?

Welcome to DatE-IT 2014!

The labor fair DatE-IT is aimed towards the students at Computer Science (D), Electrical Engineering (E) and Software Engineering (IT). It is held in the EDIT building, which is where most of the students from these programs have their classes.

This year we have 4 companies having a speakers week lecture. This will give you a chance to get an insight to the company during lunch the days before the fair. We also have 8 companies having interview sessions. For those that have applied with their CV, it will give you an opportunity to meet recruiters one on one during the fair.

DatE-IT will hold 42 different companies this year. I would like all students to take this chance to meet your next employer. The companies exhibiting ranges over all 3 programs, and varies from consulting firms, big multinational companies to small startups.

I would like to point out that no matter which year you are in, do talk to people. The people you meet during the fair, might prove to be valuable contacts. Maybe they will be the ones offering you a master thesis project, a summer job or maybe they will connect you with someone that might be of interest. This is what DatE-IT is for, to meet both companies and people.

DatE-IT - Where connections are made.

Sebastian Sandberg
Project Manager DatE-IT 2014

Accenture's Security
Apprenticeship Program

Graduate to Accenture's Security Apprenticeship Program

As security threats become more sophisticated and digital opportunities grow, businesses need to be proactive in their security efforts. At Accenture, we help our clients develop strategies and solutions to avert threats, minimize risks and capitalize on new technologies that promote growth.

We're currently looking for candidates with all types of backgrounds to join our Security Apprenticeship Program. The Security Apprenticeship Program provides you with outstanding opportunities to develop highly specialized IT skills that will help you advance in your career. When you join our Security Apprenticeship Program you join a world leader in information security that will provide you with:

- IT / Technology delivery training
- Security Methodology training
- Deep understanding of the different security capabilities
- Leadership training
- Design and Architecture training
- A range of different security and IT management certifications
- Global Community of Practice training covering new and current technology

As an entry level Security Analyst, your duties could range from evaluating security requirements to supporting the design and implementation of the client's overall IT technology and architecture. You'll get this experience while working with some of the most relevant IT products and vendors. You'll also be working alongside—and learning from—inspiring colleagues who will coach you in your day-to-day work. The sheer variety of work we do, and the experience it offers, means the Security Apprenticeship Program provides an unbeatable platform upon which you can build an extraordinary career.

SOMMERJOBB i BEKK

SØKNADSFRIST

14.

NOVEMBER

STARTA DIN KARRIÄR **MED EXJOBB HOS OSS**

Sofia Fridell började sin karriär på Saab genom att skriva sitt exjobb inom logistik. Idag är hon verksamhetsutvecklare inom eftermarknad för våra civila flygplan Saab 340 och Saab 2000. Nu kan du göra samma resa. Vi har nämligen över 500 produkter, tjänster och lösningar inom försvar och säkerhet som du kan skriva om i ditt exjobb.

Vi är idag över 14 500 medarbetare i fler än 30 länder som varje dag utmanar gränserna för vad som är tekniskt möjligt. Faktum är att vi utvecklar, tillverkar och säljer några av världens mest avancerade militära och civila system. Och det är därför vi kan erbjuda dig möjligheten att utvecklas inom ditt område samtidigt som vi tillsammans alltid strävar efter att ligga steget före.

Går du en högskoleutbildning inom teknik? Gör som Sofia – skriv ditt exjobb hos oss.

SAAB

Vill du utveckla moderna e-handelslösningar tillsammans med oss på 3bits?

Vi bygger morgondagens shoppingupplevelse tillsammans med våra framgångsrika kunder som Lindex, Focus Nordic, Brandon och Scandinavian Photo. I våras påbörjade vi ett spännande samarbete med Ragn-Sells och tillsammans bygger vi nu upp deras e-handel från grunden.

Vi genomför våra projekt in house eftersom vi tror att närhet till kollegor och gemenskap är viktigt både för arbetsmiljön och för ett effektivt samarbete. Det centrala kontoret i Göteborg kommer i slutet av året att bli ännu större. Hos oss finns det plats att växa. Vi satsar på individuell kompetensutveckling som passar just din väg framåt. Vi vet att det är viktigt att satsa på ny teknik och på medarbetare som brinner för att arbeta med intressanta projekt.

Di utsåg oss nyligen till Gasellföretag i år igen. Ett sätt att belöna tillväxt, att ge oss en bekräftelse på att vi är på väg åt rätt håll. Vi söker dig som vill utvecklas tillsammans med oss och skapa kundanpassade moderna lösningar.

Är du intresserad av att göra ditt exjobb hos oss eller av en anställning på 3bits?
Kom förbi oss på DatE-IT och prata mer, eller skicka ditt CV till jobb@3bits.se

På Accenture får du arbeta med spännande projekt för flera av Sveriges största företag i ett globalt nätverk. Vi arbetar utifrån en stark teamkänsla i en resultatorienterad företagskultur. Vi har gedigna karriärmödeller och lägger stor vikt vid coaching och kompetensutvecklingsprogram.

Accenture är ett globalt företag med verksamhet inom IT, management och outsourcing, med cirka 305 000 medarbetare och kunder i över 120 länder. Genom att kombinera erfarenhet och kunskap inom olika branscher och affärsfunktioner med omfattande forskning av världens mest framgångsrika företag, hjälper vi våra kunder att bli högpresterande företag och organisationer. Vi är alltid intresserade av att träffa ambitiösa och duktiga studenter och knyta kontakter inför framtiden.

Vi anställer kontinuerligt nyutexaminerade och kanske är just du vår framtida kollega!

Vi har svaren på (yrkes)livets stora frågor.

Vet du:

Vad en ingenjör gör egentligen?
Hur det är att jobba som konsult?
Om man själv får välja uppdrag?
Vilken kompetens som efterfrågas idag?
Hur du vill utvecklas de närmsta fem åren?
Vilka som är de starkaste spelarna i branschen?

Inte?

Då borde du komma förbi vår monter
för en karriäranalys.

Bästa Hälsningar / Alten

På Alten utvecklar och levererar vi kompetens för världsledande företag genom de mest engagerade teknik och IT-konsulterna. Våra kunder återfinns inom branscher som Energy, Telecom, Automotive, Defence & Aerospace och Industry och vi är verksamma genom hela produktutvecklingskedjan. Som en del av Alten Group har vi över 16.000 medarbetare och verksamhet i 16 länder.

At Alten Sweden we develop and deliver expertise for world-leading companies and have a committed team of engineers and IT consultants. Our customers are found in the Energy, Telecom, Automotive, Defence & Aerospace and other industries and we cover the whole product development cycle. We are a part of the Alten Group and have a workforce of over 16,000 in 16 countries.

We believe that genuine commitment comes through freedom of choice and the opportunity to have a say in one's own professional development. Our business model offers that opportunity. This freedom of choice enables us to offer our customers the very best consultants, regardless of assignment.

Appear TV, with headquarters in Oslo, Norway, is dedicated to designing world class equipment for delivery of professional video services via any infrastructure. Millions of households, in more than 100 countries, receive TV signals transmitted by Appear TV solutions.

The global TV distribution market is rapidly evolving with new technologies and trends. In order to meet future demands, Appear TV is expanding its development team. You have the opportunity to be part of an international team developing and designing the next generation broadcast infrastructure. Together with dedicated and skilled colleagues driven by technology development you can work on both in-house developed hardware and server based platforms. If you share our interests in any of the following fields, come over and have a chat with us!

- Software architecture and design methods and Object oriented programming, preferably C++
- Embedded platforms, CPUs and DSP and real-time programming on Linux Operating System
- Graphical user interface development and highly scalable software solutions
- Cloud based computing
- IP Network protocols and audio and video compression technology

BEKK er ikke et typisk IT-selskap, så vi ansetter ei heller typiske IT-konsulenter. Vi ansetter unge talenter som er klare til å utforske den utfordrende jobben det er å skape fantastisk kode.

Vi er et norsk IT-konsulent selskap med 385 ansatte, og kontorer i Oslo og Trondheim. Gjennom vår 14-årige eksistens har vi skapt oss et respektert navn i Norge, og kundene våre vet at vi leverer verdi ved å la utviklerne våre utfordre seg selv. Dette gjør vi ved å la dem utforske nye teknologier og verktøy, ved å sende dem på konferanser og kurs, og ved å la dem være nysjerrige og å fortsette å lære.

I BEKK får du muligheten til å:

- * Jobbe sammen med svært dyktige utviklere, prosjektledere og designere.
- * Være en viktig del av smidige og lean prosjekter.
- * Jobbe i et uformelt og ikke-hierarkisk miljø hvor talent verdsettes høyere enn tittel.

Vi forventer at du:

- * Jobber godt sammen med andre og liker å dele av din egen kunnskap

Burt.

Burt is a venture backed, 25 person big data startup with offices in Gothenburg and New York.

We help world leading media companies such as Condé Nast, Bonnier and Schibsted build stronger relationships with both consumers and advertisers in the new media landscape, so that they can make the transition towards a data driven, "digital first" business.

The Burt Cloud, our integrated data platform collects, combines, organizes and analyzes +100 000 requests / second, providing real-time access to processed data through APIs and our visualisation framework.

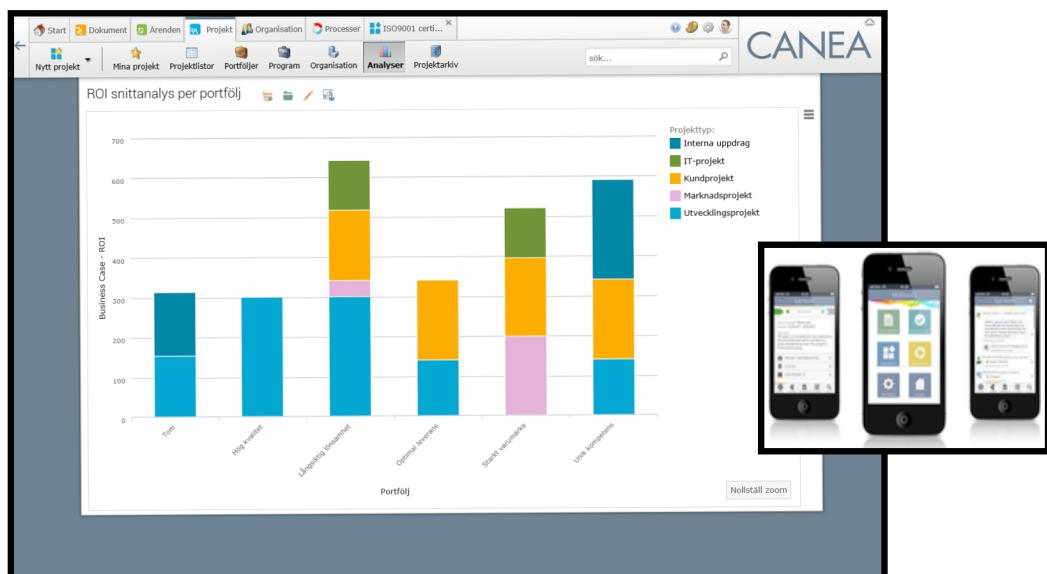

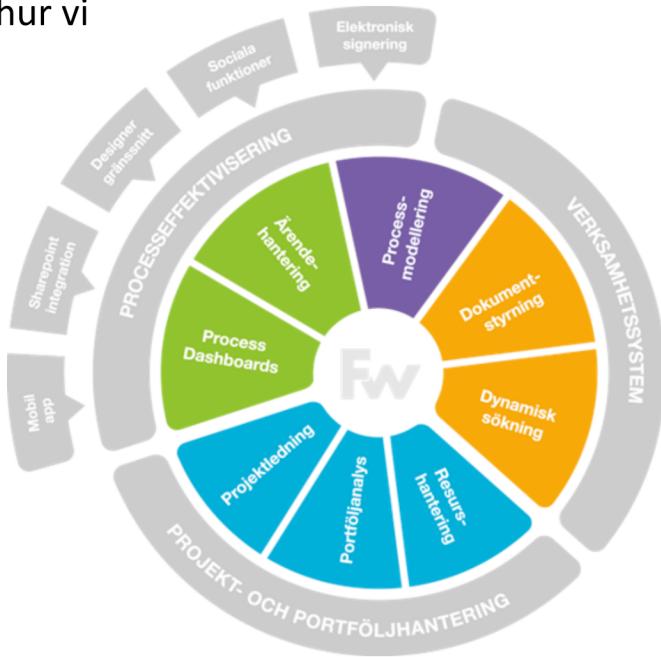

Our business is growing very, very quickly and we're searching for very, very ambitious developers to play an integral part in our engineering team which includes everything from building large scale distributed systems to delivering clients. We primarily use JRuby and Javascript as programming languages, combining proprietary technologies with open source frameworks such as Cassandra, MongoDB, Hadoop, Kafka and Angular.js.

Join us for the ride and contact us with your application!

CANEA är ett relativt litet bolag som utvecklar och säljer en produkt som går under namnet CANEA Framework. Hos oss är varje anställd viktig och har stor påverkan på hur vi jobbar och hur vår produkt utvecklas.

Combination develops a groundbreaking platform, state of the art game engine and empowering management systems for classic international casinos.

Together with our clients we act on a global and exciting market. Using products developed by us, our clients operate casinos professionally and offer high class games.

Combination was founded in 2004 and today we are about 30 people at our office in the heart of Gothenburg. With a firm market presence in select regions around the world, we cater for millions of gaming transactions on a daily basis. This solid foundation is our stepping stone as we continue to evolve and grow. At the end of the day we are a highly specialized software development company, with a firm belief that skill and passion trumps size.

Vilken är din kombination?

VI ÄR ALLA KONSULTER PÅ COMBITECH – ett nordiskt teknikkonsultföretag med över 1400 medarbetare i Sverige, Norge och Finland.

Vi erbjuder våra medarbetare en unikt sammansatt helhet där det finns utrymme att kombinera kunskaper och intressen med spännande och utvecklade projekt. Några skulle säga att det är vår främsta styrka som arbetsgivare. Vi har valt att kalla det vår kombinationskraft.

Som konsult på Combitech tar din utveckling aldrig slut. Genom kvalificerade uppdrag, i kombination med rollen som

konsult och vårt koncept för kompetensutveckling, Combitech Learning Lab, fortsätter garanterat din utveckling framåt. Vi erbjuder både stor frihet i arbetet och praktiskt stöd för att förena konsultrollen med en rik fritid.

Combitech är ett av Nordens största teknikkonsultbolag med över 1400 medarbetare i Sverige, Norge och Finland. Vi kombinerar teknisk spetskompetens med djupa branschkunskaper, helhetsförståelse och särskilt fokus på miljö och säkerhet. Resultatet är anpassade, hållbara lösningar för kunder med höga krav som verkar både nationellt och globalt. Våra kunder finns primärt inom fordonsindustri, försvarsindustri, försvar, industri och offentlig verksamhet.

BRIGHT FUTURE

Are you passionate about technology
and looking for a new career?

For two years in a row Dagens Industri
has awarded Consat for being one of the
100 most interesting career companies
in Sweden.

The Consat journey began in 1986. Since then our skills have continuously expanded. Today we are one of the major privately owned engineering companies in Sweden practicing product & production development, industrial automation, electronics & system development, telematics and sustainable energy systems.

Independently or in cooperation with our networks, we undertake complete development projects or sub-projects where enthusiasm, creative joy and results all are vital.

Our drive comes from finding new, innovative and interdisciplinary solutions. We do so by being intensely passionate about technology. We are proud of what we have achieved but still humble and eager for new challenges.

Consid is an international IT service company with customers who have the highest demands. In a competitive, global market, customer satisfaction is our main driving force - it ensures future commitment and is a prerequisite for a good working environment and long-term profitability.

WE LOVE HYBRID THINKING. DO YOU?

Vi söker fler medarbetare som älskar att tänka fritt, rakt och korsvis. Vår filosofi handlar om att kombinera olika tankesätt, läror och innovationer för att utveckla tidigare upptäckta områden. Spetskompetens, prestigelöshet och en spännande blandning av idéer driver oss framåt – som framtidens bästa säkerhetskritisika systemintegratorer.

ÄR DU DEN VI SÖKER?

- › Skicka ditt cv till hybridthinking@cpacsystems.se
- › Följ oss och våra innovationer på linkedin.com/company/cpac-systems-ab
- › Eller kom förbi vår monter!

Cybercom is an IT consulting company that assists leading companies and organisations to benefit from the opportunities of the connected world. The company's areas of expertise span the entire ecosystem of communications services, or Connectivity. Cybercom's home market is the Nordic region, and in addition the company offers global delivery capacity for local and international business.

The group has about 1,260 employees in seven countries, and therefore has an excellent foundation from which to be able to provide companies and organisations, operating both nationally and internationally, with the tools to make their operations more efficient and develop new products and services to enhance their competitiveness.

Cybercom's offering is organised into four areas: Digital Solutions, Connected Engineering, Connectivity Management and Secure Connectivity. Cybercom's expertise in these areas means that for many years the company has been entrusted with delivering services and projects to several prominent companies in different industries, such as Alma Media, Ericsson, Millicom, MTV Oy, Saab, Sony Mobile, ST-Ericsson, TeliaSonera, Volvo and Volvo Car Corporation.

Enfo

ENFO är ett framstående nordiskt IT-företag som erbjuder effektiva paketlösningar för outsourcing av IT och affärsprocesser, samt nischade IT-konsulstjänster som hjälper kunder i Sverige, Norge, Danmark, Finland och runtom i världen att fokusera på sin kärnverksamhet.

Med 50 års erfarenhet av utveckling av IT-lösningar och IT-koncept och med närmare 800 IT-konsulters ingående expertis gör vi affärsprocesser enklare, smidigare och smartare.

Förutom IT-outsourcing och outsourcing av affärsprocesser, till exempel programhantering, nätverkstjänster, informationslogistik, servicedesk och användarsupport, erbjuder vi IT- och affärslösningar för SAP, identitets- och behörighetskontroll för IT-säkerhet, business intelligence, integrationslösningar, samordnad kommunikation samt arbetsplats- och självbetjäningslösningar.

Ericsson is a world-leading provider of telecommunications equipment and services to mobile and fixed network operators. Over 1,000 networks in more than 180 countries use our network equipment, and more than 40 percent of the world's mobile traffic passes through Ericsson networks.

We are one of the few companies worldwide that can offer end-to-end solutions for all major mobile communication standards. Our networks, telecom services and multimedia solutions make it easier for people, across the world, to communicate.

And as communication changes the way we live and work, Ericsson is playing a key role in this evolution. Using innovation to empower people, business and society, we are working towards the Networked Society, in which everything that can benefit from a connection will have one.

Our vision is to be the prime driver in an all-communicating world.

Evidente är ett ingenjörsföretag som erbjuder tjänster till företag som utvecklar produkter med inbyggd programvara och elektronik. Våra specialistområden är mjukvaruutveckling, systemutveckling och verksamhetsutveckling. Våra kunder finns inom områdena fordon, telekom, medicin och industri.

Fokus för verksamheten är att erbjuda våra kunder en komplett produktutvecklingsförmåga och vi har lika delar uppdrag inne på kontoret och ute på plats hos våra kunder. Vårt dagliga arbete är präglat av struktur och leveransorientering för att kunna erbjuda högsta kvalitet till såväl våra kunder och leverantörer som till våra kollegor. Kvalificerade medarbetare är vår största tillgång och vår personal består i huvudsak av civilingenjörer med allt från lite kortare till mycket lång erfarenhet.

Vårt arbetssätt i kombination med våra erfarna ingenjörer ger utmärkta verktyg att nå resultat, utveckla sig själv och skapa nöjda kunder.

Talent attract talent. To find new talented people we must make the ones who are already working here thrive and feel inspired. How? Well, talented people must be respected as equals and be given the freedom to create and innovate. You don't hire a talent to tell him or her how to do what they are talented at. We want our people to feel encouraged to act independently and bravely, that is how their talents best are put to use for Findwise and our clients.

Tomorrow, simplicity will rule. Simplicity means easier, faster and smarter. We are experts in creating search driven solutions for various business needs. Among our clients are SKF, SCA, Chalmers, SEB, Scania, Swedish Social Insurance Agency and Telenor. Our goal is to help them maximize the business value of their information assets. To make knowledgeable decisions easier and faster.

Award winning Findwise, founded in 2005, is a growing IT consultancy with 100+ employees at offices in Sweden, Denmark, Norway and Poland. We offer platform independent consulting to create Findability solutions. We supply search technology expertise as well as consulting in related fields such as user experience, linguistics, information management, big data and security.

A close-up photograph of a young girl with long brown hair, wearing a dark blazer over a white collared shirt and a red tie. She is holding a black pen near her ear, looking thoughtfully upwards and to the side. The background is a neutral grey.

Ghost Games, based in Gothenburg, was founded 2011 as a unique installment in EA – a studio being built from scratch. Since then we have attracted both experienced game developers from around the world as well as local talents from regional schools to our office in downtown Gothenburg. As well as making games that are fun for our customers we also bring that to our work environment, believing that employees who enjoy their work will also create games that people can enjoy.

The first game that was released by Ghost was Need for Speed Rivals in 2013 and it was, as many other EA games, built on the Frostbite engine. The studio is now effectively a hub for the Need for Speed franchise, working with teams in multiple international locations.

Google is and always will be an engineering company. We hire people with a broad set of technical skills who are ready to tackle some of technology's greatest challenges and make an impact on millions, if not billions, of users. At Google, engineers not only revolutionize search, they routinely work on massive scalability and storage solutions, large-scale applications and entirely new platforms for developers around the world. Apply for a job: google.com/jobs.

Google has an exciting and innovative internship program for students in a variety of different fields. We're looking for students pursuing degrees in computer science and related areas who love to problem-solve, code and design. If you like working on challenging and intriguing problems in an entrepreneurial environment that respects creative approaches and solutions, then a Google internship is for you. To learn more, see: google.com/jobs/students.

We're all about creating the best digital products in LatAm and Africa. Our markets are currently experiencing a digital boom and reach more than 1.5 billion people. Everyone who is or will be connected is a potential user.

We are product perfectionists working at high pace, aiming to build 1-3 products per year. Our mission is to change the way people use digital services, starting within entertainment and media.

We work with global possibilities and are present in Europe, Africa and in the Americas, and our tech teams are setup in Stockholm, a progressive hub for tech startups.

We are a diverse team from all over the world that consists of 40 multi-talented, fun-to-be-with people (two of them are coaches for the national programming-team). We have a ping-pong table, a playful attitude and we always celebrate our victories.

If you want to join us on the journey ahead and think you've got the skills for it – drop by and let us know.

Qualisys is a leading provider of motion capture technology and has a long history of supplying research, engineering and sports facilities with the tools and know-how of capturing and analysing movements. Qualisys offers a wide range of products and services, including its advanced motion capture platform, which is the core business. The platform consists of optical motion capture cameras and the software needed to process and analyze the motion data. It's the same technology used for animation in block buster games and movies.

At Qualisys, we dabble in product design, embedded programming, image processing, linear algebra, opengl programming, software testing and more. Qualisys' headquarter is located in central Gothenburg and currently has 30 employees.

Would you like to be a part of a company that is always looking to the future and constantly pushing the technological boundaries? Saab can offer you the possibility to develop professionally and personally in an international environment with colleagues, customers and business partners located across the world. We know that the students of today are the key employees of tomorrow. Therefore we welcome students who want to write their master thesis within Saab and also offer practical training before you have completed your formal education. We seek diversity and are actively working to increase the share of female managers at Saab.

We are a product development company offering services in embedded wireless system development. We work with global technology leaders and small innovative companies alike.

With years of experience in designing and developing automotive, telecom and medical products employing wireless communication technologies; we help our clients through each phase of product life cycle of a wireless embedded system. With Scionova onboard, you get access to a pool of talented engineers; who has years of industry experience and have a passion for wireless technology. Scionova has developed and deployed many embedded wireless systems on schedule meeting highest quality standards.

Scionova is specialized in product development, and offers services for each phase of wireless embedded product life cycle. The company is founded in 2005 and has its headquarter located in the southwestern parts of Sweden.

Scionova has a team of cherry-picked engineers who has a passion for wireless embedded systems backed with extensive experience in designing and developing embedded wireless systems.

Our client portfolio ranges from great world-leading technology companies to smaller start-up companies.

And so, our goal is to always provide assignments where you will work on cutting edge technologies and can sharpen/develop skills to reach career goals.

Sigma is one of the leading IT consultancy companies in Sweden. We work with many large globally-active Swedish companies and we strive to follow them all the way, both here in Sweden and on the international market. We have many experienced consultants and run large managed service projects.

Sigma is divided into six companies: Sigma IT & Management, Sigma Technology, Sigma Industry, Sigma Civil, Sigma Software and Sigma Connectivity. Together we form the Sigma Group – a leading consultancy group, with the objective to make our customers more competitive.

We have operations in Sweden, Canada, China, Finland, Germany, Great Britain, Hungary, Ukraine, and USA. We work with new and future technologies, such as next generation mobile networks, smartphones, consumer portals for mobile carriers, and computer networks in vehicles.

Do you see your future career as a technical writer, tester, developer, fault tracing engineer, or project manager? Talk to Sigma at DatE-IT!

At SpeedLedger we value simplicity, responsibility, courage and we love a hint of madness. We focus on our customers and do not waste time implementing time-consuming procedures and regulations. Our curiosity is what propels us forward and what keeps us focused on our goal - to make administration easier and more enjoyable for all small businesses out there.

Do you have what it takes? Welcome to our show room to put your engineering skills on test!

Want to work for Spotify? We're always on the look-out for clever, talented people who love a challenge and share our goal - to help everyone find the right music for every moment, wherever they are.

Come. Join the band.

Achieve the Amazing

En Squeeder har passion för sitt yrke, gillar att driva och att dela med sig av kunskap till sina kollegor.

Tillsammans är vi Squeeders en kraft som injicerar energi i morgondagens marknadsledare.

Vi är vana att gå först, du har kanske redan stött på oss på Javaforum, SweNUG eller någon konferens? Kanske varit med på någon av våra kodkator eller läst vår blog?

Vi har ett kall att driva utvecklingen framåt mot vår vision -
Achieve the Amazing!

Squeed AB är ett kompetens och innovationsbolag verksamt inom mjukvarutveckling.
Vi har skapat en innovationskraft där varje medarbetare hjälper till med att ta fram nya affärsidéer i form av produkter och tjänster.
Denna innovationskraft leder och utvecklar företaget. Att stimulera och tillvarata kreativitet är därför vår grundläggande affärsidé.

Squeeders jobbar med systemutveckling, arkitekturfrågor, coaching, mentorskap, utbildningar, metoder mm. Vi är experter på Java, Microsoft .Net och open source. Vi är mycket ute som konsulter och bygger det våra kunder vill ha men arbetar också med att ta fram nya tjänster och produkter.

Squeed är djupt engagerade i communityn kring mjukvarutveckling så som Javaforum, nforum mm.
Squeeders syns och hörs ofta på konferenser och mjukvaruträffar som Javaforum, JavaOne, Microsoft TechDays, MSDN Live, SweNug, Developer Summit, JFocus, JavaZone...

Vi är ännu ett ganska litet gäng i Göteborg men vi har stora ambitioner och behöver duktigt folk som vill vara med att uppnå "Achieve the Amazing".

Det är på ÅF det händer!

Vill du bli en del av vinnarlaget
på den tekniska arenan?

Med passion för teknik, genuina
lagspelare och en enorm kollektiv
kunskap, löser ÅF morgondagens
utmaningar.

ÅF är hjärtat i teknikvärlden.

ÅF leads the way in technical consulting.
Our work focuses on energy, investments in infrastructure and projects for industry.
Our base is in Europe, but our business and clients extend right across the globe.
What makes us unique is our co-workers, our networks and the technical consulting industry's greatest bank of experience.

It's all summed up in our corporate motto:
ÅF – Innovation by experience.
